Overview on Taiwan

Taiwan lies on the western edge of the Pacific "rim of fire," and continuous tectonic movements have created majestic peaks, rolling hills and plains, basins, coastlines, and other wonders. Taiwan sees climates of many types: tropical, sub-tropical, and temperate, providing clear differentiation between the different seasons. There are about 18,400 species of wildlife on the island, with more than 20% belonging to rare or endangered species; among these are the land-locked salmon, Taiwan mountain goat, Formosan rock monkey, Formosan black bear, blue magpie, Mikado pheasant, Hsuehsan grass lizard, and many more.
